Experience

Professional practices on Devdatep Consulting E.I.R.L. Noviembre – 2022 → Today

- In charge of the layout of components in React, using VITE, for the internal control of users and company personnel, creating tables with their CRUD, connecting them with the backend through various APIs, using Axios.
- Restructuring of components in folders for optimization and code cleanup.
- Layout with Mobile and Desktop design, using TailwindCss, according to Figma requirements.
- Version management using Git and GitLab.

Admin E-Commerce August – 2022

- SPA of a simple dashboard, where the CRUD functionality for products stands out, whose data was extracted from an external API.
- The entire application was built by integrating knowledge of CSS, JavaScript, React.js, Next.js, Tailwind UI, Post Css, ESLint, and Git.
- Consumption of an external API, using Axios, to get the token and save it in a cookie.

Yard Sales SPA July – 2022

- Shopping cart SPA, where I implemented knowledge of HTML, SASS, JavaScript, React.js and Next.js, also using Webpack, Eslint, Git.
- Use of React Router DOM, React Context and custom Hooks, transforming HTML and CSS into React components. Use of useEffects and useState.
